

Sonodre PSB-402LI with LI-ION batteries and 6 pin XLR

LI-ion batteries has no memory effect and no self discharge.

Battery power:

- Maximum operating time, full battery: Over 150 hours
- First connect the 5pin XLR of the chargers to the power supply than connect the chargers to the mains power.
- Charger red light on: charging
- Charger green light on: fully charged
- When the green light is on: the charges switches to trickle charging
It may be connected to the mains power
- Input mains voltage 90-264Vac
- If max operating time is lower than 10 hours: consider replacing batteries

To increase the life span of the batteries

- Don't charge them before storage, leave it half charged.
- Charge before recording
- Avoid storage at frost
- Avoid deep discharge

Battery meter:

- When the needle is exactly between the red and the green: a few hours recording is left.
- When the needle is at the left of the red zone: batteries are empty, and the power supply will be shut off.
